HOUSING SNAPSHOT - DEMOGRAPHIC & ECONOMIC CHARACTERISTICS

University of Nevada, Reno Extension
Publication Date: January 2025
For Informational Purposes

This fact sheet contains baseline housing demand data to assist local and state agencies in better understanding the communities that we live in, specifically in relation to housing.

Demographic and economic data are commonly used for evaluating a community's housing market. Understanding the data on population, age, race & ethnicity, poverty, and educational attainment helps illustrate the people in the community, while economic characteristics such as income, employment, and occupations provide an understanding of the community's capacity and resources. Learning about these traits facilitate the analysis of housing availability and affordability in the communities.

CARSON CITY 2025

HOUSING SNAPSHOT - HOUSING SUPPLY CHARACTERISTICS

University of Nevada, Reno Extension
Publication Date: January 2025
For Informational Purposes

This fact sheet contains baseline housing supply data to assist local and state agencies in better understanding the communities that we live in, specifically in relation to housing.

Before any analysis can be completed, an understanding of the current housing supply must be achieved. Here, common housing data, such as total housing units, structure type, age of housing, vacancy, and tenure are shown. This baseline data illustrates the current state of housing in the county and selected communities. Learning about these traits facilitate the analysis of housing availability and affordability in the region.

Extension.unr.edu/NEAP

Terminology

Tenure— The classification of a housing unit between owner-occupied and renter-occupied.

Vacancy— Vacant housing units are those units that are unoccupied for a majority of the year. Only some of these units are available to be moved in to, those labeled 'For Rent' or 'For Sale'.

Other labels suggest that these may not be available. For instance, 'Seasonal or Occasional' suggests that the units are second homes used for vacation. 'Other' often suggests the units are condemned or otherwise unlivable. 'Other' also includes units that are rented, or sold, but not currently occupied.

Building Permits

In 2022, 272 single family building permits were issued throughout Carson City.

Since 2000, 1,066 multi-family unit permits have been issued.

*Subsidized Housing

CARSON CITY 2025

HOUSING SNAPSHOT - HOUSING DEMAND CHARACTERISTICS

University of Nevada, Reno Extension
Publication Date: January 2025
For Informational Purposes

This fact sheet contains baseline housing supply data to assist local and state agencies in better understanding the communities that we live in, specifically in relation to housing.

'More housing' does not always fix a housing problem. Housing solutions must match the needs of a community. Households of different sizes and different income levels require varied housing units. Looking at household size, home values, median income, and cost burden can help facilitate the analysis of housing demand in the region.

[Extension.unr.edu/NEAP](https://extension.unr.edu/NEAP)

Terminology

Gross Rent— This includes contract rent as well as basic utility costs for the housing unit (such as electricity, water, sewer, and natural gas.)

Cost Burden— Per the definition from HUD, a household is 'overburdened' if it spends more than 30% of monthly gross income on housing costs.

Housing costs include both the rent or mortgage on the unit, as well as additional costs including utilities, property taxes, and insurance.

All data in this table refers to total households in the region, not total housing units.

***Note:** The subregions for this fact sheet were defined by census tracts. The data source used here does not have Census Tracts as an option.

Affordability: The U.S. Department of Housing and Urban Development characterizes "affordable housing" as housing for which the occupant spends no more than 30 percent of their gross income on housing expenses, including utilities. This threshold is designed to allow households sufficient funds for other essential expenses.

This table on the previous page shows the **gap in affordability** for households at various income levels versus the average housing cost, for both owners and renters.

As an example, the annual median income for a household in Carson City is **\$67,465**. A family at **80%** of that makes **\$53,972** annually. As a homeowner of an average house in the county, the Monthly Estimated Housing Expense is **\$4,007**. This includes mortgage, taxes, insurance, and utilities. The Monthly Affordable Housing Expense (30% of gross income) shows at only **\$1,462** at 80% median income. This difference gives a gap of **-\$2,545**, making it unaffordable at the 80% income level.

CARSON CITY 2025

HOUSING SNAPSHOT - HOUSING AFFORDABILITY ANALYSIS

University of Nevada, Reno Extension
Publication Date: February 2025
For Informational Purposes

This fact sheet contains baseline housing analysis to assist local and state agencies in better understanding the communities that we live in, specifically in relation to housing.

This is an analysis showing the current affordability of housing in the county and selected communities. Here, the data from the previous fact sheets, demographic and economic characteristics, housing supply, and housing demand data, are used to view the affordability (or lack thereof) of the current housing market. This analysis can be used to inform decision makers, home producers, and land managers in their region.
